### Objective

The Fund's objective is to achieve a total return greater than that of the NSCI (XIC) over the long term by investing in a diversified portfolio of small UK quoted companies.

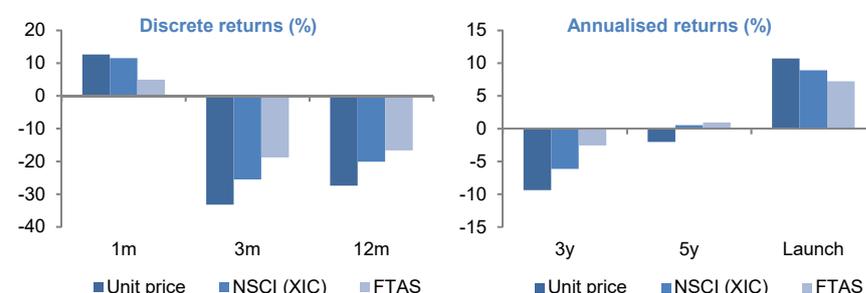

### Investment style: Value

Aberforth are value investors who buy shares in companies that they calculate to be selling below their intrinsic value. This is determined through detailed financial and industrial analysis, combined with a valuation approach that focuses on both stockmarket and corporate worth.

### Investment performance (annualised total returns)

Growth (%)	1m	3m	12m	3y	5y	Launch
Unit price	12.6	-33.2	-27.4	-9.4	-2.0	10.7
NSCI (XIC)	11.5	-25.5	-20.1	-6.1	0.5	8.9

Notes: 1m & 3m returns not annualised; Launch date = 20 Mar 91; Unit price = Cancellation price of the Fund's Accumulation units; FTAS = FTSE All-Share Index.

### Investment commentary

After a torrid March for stockmarkets, company updates and macro-economic data in April confirmed a substantial downturn in activity. However, equities responded positively to further government support for the economy and to evidence that the pandemic was being brought under control. The FTSE All-Share rose by 4.9%, but, having proved more resilient in March, lagged the NSCI (XIC)'s return of 11.5%. It was also affected by evidence that Covid-19 would put pressure on the dividends of even the largest companies. The Fund secured a return of 12.6%, on which style factors had negligible effect.

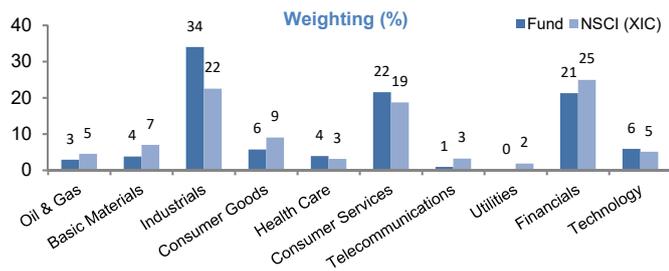

Against this backdrop of improved sentiment, those stocks that had suffered most in March tended to perform most strongly in April. Amongst these were RM, a supplier of education materials to schools, brick manufacturer Forterra, specialist recruiter Robert Walters and mining royalties company Anglo Pacific. Elsewhere, industrial textile manufacturer Low & Bonar performed strongly following EU competition clearance for the takeover by Freudenberg.

Cancelled dividends are not confined to the FTSE 100. Companies that have chosen to cut, cancel or defer their dividends stood out among the losers. These included news publisher Reach, food producer Bakkavor, International Personal Finance, and windows and doors manufacturer Eurocell, whose under-performance was compounded by a placing of new shares. More broadly, equity issues have started. There have been several placings of up to 20%, taking advantage of relaxed pre-emption rules, but the bigger rights issues will likely come in early Summer.

## Data sources & calculations

All data supplied by Aberforth, except NSCI (XIC) data (from Numis/Paul Marsh and Elroy Dimson – London Business School) and FTSE data (from FTSE International Limited).

Performance returns are total returns after all expenses and assume reinvestment of dividends. Yield is based on the Fund's trailing 12 months' dividends. Active share is a measure of how the Fund's portfolio differs from the NSCI (XIC). Small companies are represented by the NSCI (XIC). Large companies are represented by the FTAS.

## Standardised past performance

Discrete total return performance over 12 month periods to 31 March:

Growth (%)	2020	2019	2018	2017	2016
Unit price	-32.4	-4.5	6.0	22.4	-0.4
NSCI (XIC)	-25.9	-1.2	5.2	18.8	4.2

Notes: the table above is updated on a calendar quarter basis in accordance with the Financial Conduct Authority's regulations; Unit price = Cancellation price of the Fund's Accumulation units.

## Risk warnings

COVID-19 virus – in the context of market price risk, please note the exceptional circumstances arising from the COVID-19 pandemic and the responses to it. These have profoundly affected macro-economic activity, the operations of companies around the world and their stockmarket valuations. The universe of UK small quoted companies market invested in by the Fund, has seen a significant fall in its aggregate valuation due to the uncertainties arising from the spread of this virus. Aberforth Partners LLP and the Directors of Aberforth Unit Trust Managers Limited are closely monitoring market developments as the impact of the pandemic progresses.

Capital may be at risk as the value of investments may go down as well as up and is not guaranteed; therefore investors may not get back the amount originally invested. Past performance is not a guide to future performance, nor a reliable indicator of future results or performance.

Investments in shares of smaller companies are generally considered to carry a higher degree of risk as the market for their shares may be less liquid than that for shares of larger companies, making shares of smaller companies more difficult to buy and sell.

The performance of shares of smaller companies may be more volatile than the shares of larger companies over short time periods; therefore investors should regard such investments as long term.

There can be no guarantee that the investment objective of the Fund will be achieved or provide the returns sought by the Fund.

An investment in the Fund is only suitable for investors who are capable of evaluating the merits and risks of such an investment and who have sufficient resources to be able to bear any losses which may arise from such an investment (which may be equal to the whole amount invested). Such an investment should be regarded as long term in nature and complementary to existing investments in a range of other financial assets and should not form a major part of an investment portfolio.

The dealing spread of the Fund, which represents the difference between the buying and selling prices, will have an impact on the realisable value of any investment made in the Fund, particularly in the short term. To mitigate the impact of capital erosion, investors should regard investments in the Fund as long term.
