Monthly investment commentary: January

Stockmarkets started the year strongly, with UK smaller companies out-performing their larger counterparts. The Fund's benchmark, the DNSCI (XIC), rose by 4.3%, ahead of FTSE All-Share's 3.1% return. In comparison, the Fund returned 5.3%, with little influence from size and style factors.

Leading the winners was power controls manufacturer **XP Power**, which reported improved order trends for the coming year. Asset managers were also helpful as **Ashmore Group** reported net inflows and **Jupiter Fund Management** continued its positive run despite no company specific news. Among capital goods suppliers, **Senior** raised its profit expectations for the year after good control of costs in its various aerospace operations. Finally, **Ecora Royalties** benefitted from soaring commodity prices to which its royalty and streaming portfolio is exposed.

Detractors to performance included **C&C Group**, the drinks business, which reported weak trading over Christmas and a lower profit outlook for 2026. In the gaming sector, **Rank Group** weakened as the stockmarket weighed the risk to profits of gaming duty increases at the Budget.

Gearing

The Fund has a bank debt facility of £130m available for use as gearing by the Manager at any time. The net gearing/(liquidity) figure shown in the Key Fund information section indicates the percentage by which the total value of investments exceeds the total net assets.

Continuation vote & share buy-backs

The continuation of the Fund is voted on by shareholders at every 3rd AGM. The next vote will occur at the AGM in March 2026.

The Fund operates a share buy-back policy. A list of the buy-back transactions during the last 5 years is available at www.aberforth.co.uk.

Data sources & calculations

All data supplied by Aberforth, except DNSCI (XIC) data (from Deutsche Numis/Paul Marsh and Elroy Dimson – London Business School) and FTSE data (from FTSE International Limited).

Performance returns are total returns after all expenses and assume reinvestment of dividends. Yield is based on the Fund's trailing 12 months' dividends (excluding Specials). Active share is a measure of how the Fund's portfolio differs from the DNSCI (XIC). Small companies are represented by the DNSCI (XIC). Large companies are represented by the FTAS.

Risk warnings

Capital may be at risk as the value of investments may go down as well as up and is not guaranteed; therefore investors may not get back the amount originally invested. Past performance is not a guide to future performance, nor a reliable indicator of future results or performance.

Investments in shares of smaller companies are generally considered to carry a higher degree of risk as the market for their shares may be less liquid than that for shares of larger companies, making shares of smaller companies more difficult to buy and sell.

The performance of shares of smaller companies may be more volatile than the shares of larger companies over short time periods; therefore investors should regard such investments as long term.

There can be no guarantee that the investment objective of the Fund will be achieved or provide the returns sought by the Fund.

An investment in the Fund is only suitable for investors who are capable of evaluating the merits and risks of such an investment and who have sufficient resources to be able to bear any losses which may arise from such an investment (which may be equal to the whole amount invested). Such an investment should be regarded as long term in nature and complementary to existing investments in a range of other financial assets and should not form a major part of an investment portfolio.

An investment trust is a public limited company, the shares of which are traded on the main market of the London Stock Exchange. Accordingly, the ability of shareholders to sell their shares will be dependent on the market price of the shares. The shares may trade at a discount or premium to their net asset value.

Investment trusts may borrow money in order to make further investments. This is known as gearing. The effect of gearing can enhance returns to shareholders in rising markets but will have the opposite effect on returns in falling markets.

Further information on the Fund, including the Key Information Document, is available on request or via the Aberforth website www.aberforth.co.uk.
